

# Statistical challenges in the Chandra Cygnus OB2 Survey

Nick Wright

Jeremy Drake, Vinay Kashyap, Tom Aldcroft,  
Mario Guarcello, Antonella Fruscione

Cygnus Region

Ophiucus Region

Lupus Region

Vela Region

Taurus Region

Orion Region

Andromeda Galaxy

Galactic Center

Large Magellanic Cloud

Rosette Nebula

Betelgeuse

Orion

1 O star

1-2 Myr old

3,000  $M_{\text{sun}}$

Cygnus OB2

65 O stars

1-5 Myr old

20,000  $M_{\text{sun}}$

30 Doradus

150 O stars

1-5 Myr old

63,000  $M_{\text{sun}}$

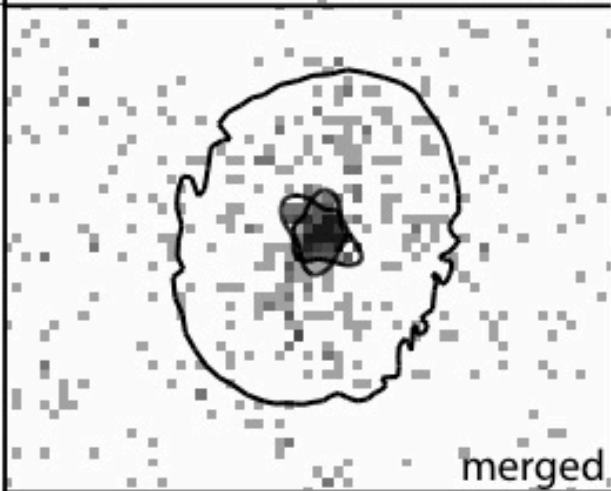

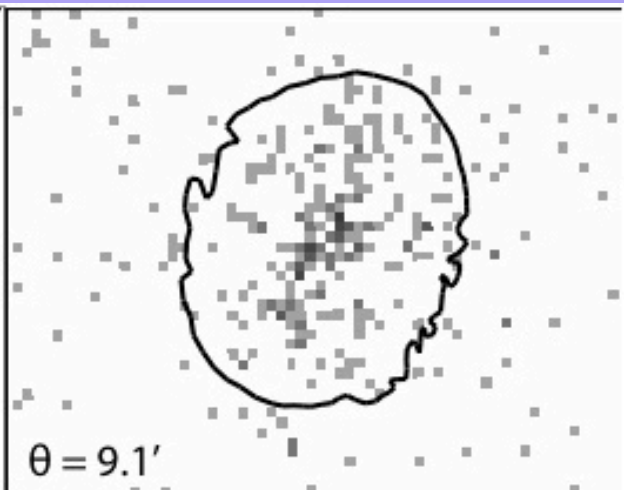

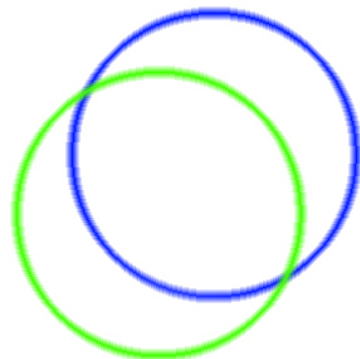

Source detection : 1 detection = 1 source

Source detection : 2 overlapping detections = 1 source

Source detection : 3 overlapping detection = 1 source

Source detection : 4 non-overlapping detections = 2 sources

Source detection : 5 non-overlapping detections = 3 sources?

Source detection : 3 non-overlapping detections = ? sources

Source detection : 21 non-overlapping detections = ?\$!#^&!#\*
